PIC OF THE WEEK

A sad moment, but for those of you who didn't know, one of the motorcycle communities favorite places to stop, RHINO's in Bewdley burned down recently.

SAFETY TIP OF THE WEEK

Cold weather riding

Whether we want to admit it or not, Mother Nature is getting ready to end our riding season. There are a couple things to remember when riding on colder days. Obviously you have to dress warm because your thought process and concentration gets clouded when you are cold. Layer properly. You will start to worry about getting warm and may make some costly mistake while rushing or not paying attention to the road. Secondly, your tires won't grip as well to the road if they aren't warm. Be a little more careful on corners and try to warm up the tires by doing little zig zags on straight sections of the road. Also double check you have lots of tread left and your tire pressure is up as tire pressure drops as the temperature drops. Here is a good site for tips:

FAVORITE ROADS

HWY 141 Between Hwy 11 and Hwy 400 This is Muskoka at its finest. There are plenty of twisties and elevation changes on this route. You will pass lots of scenic views of lakes on this route and lots of bikes as it is a favorite of many riders. There are numerous routes you can also take from this road which are also very biker friendly and combine them for an incredible day in the Muskokas. *(NOTE: Bridge repair started on August 27, 2015 means that riders cannot pass between Bent River and Rosseau until construction is completed later in the fall.)*
